

# ROHIT BOORA

AI Developer & Cloud Engineer

+91 9053053609 | rohitboora2005@gmail.com | Hansi, Haryana | linkedin.com/in/rohitboora-ai | github.com/RohitBoora05

## EDUCATION

### B.Tech — Artificial Intelligence & Data Science

Guru Jambheshwar University of Science & Technology, Hisar

### BS — Applied Data Science (Online Degree)

Indian Institute of Technology Madras (IIT Madras)

## EXPERIENCE

### Python Developer Intern

Feb 2026

ShadowFox

Remote

- Analyzed and implemented Google BERT and transformer-based AI models for NLP tasks
- Built Python pipelines for model evaluation and tokenization workflows using HuggingFace Transformers
- Documented findings on encoder architecture, multi-head attention, and token embeddings

## PROJECTS

### AWS Cloud Portfolio

[AWS \(S3, CloudFront, Lambda, DynamoDB, EC2\)](#) · [React](#) · [FastAPI](#) · [Terraform](#) · [Docker](#) · [GitHub Actions](#)

- Production-grade serverless cloud infrastructure built from scratch on AWS
- Implemented CI/CD pipeline via GitHub Actions; FastAPI AI backend with serverless visitor counter
- Covers Terraform IaC, Docker containerization, and multi-service AWS deployment

### Career Stream Advisor

[Python](#) · [NLP](#) · [Scikit-learn](#) · [Classification](#) · [AI](#)

- AI-based recommendation system classifying academic career paths (Science vs Commerce streams)
- Processes student responses using NLP classification pipeline; built during SIH preparation round

### BERT Architecture Analysis

[Python](#) · [HuggingFace](#) · [Transformers](#) · [Jupyter](#) · [PyTorch](#)

- Deep mechanistic analysis of Google BERT: encoder layers, multi-head attention, token embeddings
- First-principles study of transformer internals; fully documented and open-sourced on GitHub

### Explain My Mistake Engine

[Python](#) · [ML](#) · [NLP](#) · [Cognitive Science](#)

- Cognitive mistake taxonomy framework for GATE CS exam post-exam self-diagnosis
- Identifies 8 non-overlapping cognitive failure categories — which mental process failed at decision point

## TECHNICAL SKILLS

|             |                                                                                                                |
|-------------|----------------------------------------------------------------------------------------------------------------|
| Languages:  | Python, JavaScript, C, C++, R, HTML, CSS                                                                       |
| AI / ML:    | PyTorch, TensorFlow, HuggingFace Transformers, BERT, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, Jupyter |
| AWS Cloud:  | S3, EC2, Lambda, DynamoDB, CloudFront, API Gateway, IAM, CloudWatch, RDS, VPC, SNS                             |
| Web & APIs: | React, FastAPI, Vite, REST APIs                                                                                |
| DevOps:     | Docker, Terraform, GitHub Actions, Git, Linux, AWS CLI                                                         |
| Tools:      | VS Code, Jupyter, R Studio, WSL, BeautifulSoup, Requests                                                       |

## CERTIFICATIONS & ACHIEVEMENTS

- Python Developer Internship Completion Certificate — ShadowFox (Feb 2025)
- Participation Certificate — Smart India Hackathon (SIH)
- Workshop Completion Certificate — Cloud Computing
